Benefits

Reduced Development Time and Cost

SOA services are easily reused and can be rapidly assembled into new, composite applications.

Lower Maintenance Costs

Reusable services reduce the number and internal complexity of IT services.

Higher Quality Services

Increased service reuse creates higher-quality services through multiple testing cycles from different service consumers.

Lower Integration Costs

Standardized services know how to work together, enabling disparate applications to quickly and easily connect.

Reduced Risk

Fewer, reusable services provide greater control over corporate and IT governance policies and reduce the overall compliance risk.

SOA Quick Start

Today's enterprises are gaining a competitive advantage and realizing increased productivity by deploying Service Oriented Architecture within their IT infrastructure. SOA enables the integration of complex applications by creating modular reusable business services. Using Web service standards, such as SOAP and WSDL, organizations can extend rather than redesign their existing architecture.

Zirous has developed a SOA implementation framework and best practices, so we can maximize your technology investments by building upon and integrating systems you've already established. Using Oracle's best-of-breed software, Zirous created a SOA Quick Start program to lower your entry point into SOA.

Included

SOA Methodology Workshop

- One day workshop encompassing the aspects of SOA that are critical for your business

Target Project Definition

- Discovery sessions to define a high value target project

Implementation Plan

- Joint creation of an implementation plan, outlining milestones and essential personnel

Implementation

- Iterative implementation of target business process or integration

Oracle Application Server Enterprise Edition

- Production version of Oracle's industry-leading middleware platform

Oracle SOA Software

- Includes: Oracle BPEL Process Manager

Oracle Database

- Oracle Database 11g Standard Edition One
